

Case Studies in Urban Freeway Corridors

From Signalization to Land Bridges

Webinar: Monday, Sept. 30, 8:30 - 10 a.m. Central

About the Webinar

Transportation agencies are exploring and implementing many tools for enhancing public spaces near freeways including bridges over highway segments, freeway removal, freeway relocation, and freeway conversion into signalized roadways. MnDOT is working to share what is happening around the country related to innovations that balance the needs of all users, enhancing public space and connections near urban freeways.

This webinar offers an opportunity to hear from two other states that are in the process of implementing changes to urban freeways.
